Crestline warrants that its factory-applied painted finishes will not peel, blister, or flake for TEN (10) years. Factory-applied painted finishes will not exhibit excessive color change for TEN (10) years. Note: This coverage does not extend to discoloration, polish, surface damage, or alteration caused by the use of natural or chemical solvents or an environmental factor causing such damage.

Fading or changing in color of the factory-applied painted finishes is not a defect unless it exceeds five (5) E units, calculated in accordance with ASTM D2244, paragraph 6.2. Color change shall be measured on an exposed colored surface that has been cleaned of soils, and the corresponding values measured on the original or unexposed colored surface. Fading or color changes may not be uniform if the surfaces are not equally exposed to the sun and elements. If the above ASTM standards change, the standard in effect at the time of purchase applies. As an option to replacement, we may choose to refinish the product.

NON COVERAGE

- Normal wear and tear, weathering and natural variations in wood color or texture are considered normal and not a product defect.
- Normal wear and tear of hardware and hardware finishes that can naturally occur (e.g. corrosion, tarnishing) or damage at construction site.
- Minor scratches, slight glass curvature or glass imperfections are natural variances in glazing and do not impair structural integrity or significantly obscure normal vision.
- Repairs, refinishing or similar activities involved when skilled labor installs or replaces products.
- Condensation and any related water damage (such as mold or wood rot due to water or ice build up), which occur as a result of humidity within the property or changes in the interior/exterior temperatures, do not indicate a defect. Contact a heating/cooling specialist to assist.
- Products installed in a non-vertical position, discoloration of non-visible parts, or failures or operating difficulties due to accident, acts of God, abuse, misuse, alteration, exposure to the elements, improper or insufficient handling, storage, maintenance or service including, but not limited to, obstruction of weep holes. Installation of units must be finished and operated in accordance with our installation instructions attached to each unit.
- Failures or operating difficulties resulting from use of high-expansion foam insulation, incompatible sealant, cleaning agent, or exposure to corrosive, unusual, harmful or aggressive substances, acid rain, fumes or condensates, subjection to abnormal stress from localized application of heat, excessive vibration or movement of buildings or foundations or to other abnormal physical stress or use in high humidity areas.
- Products installed in buildings with cladding systems that do not allow for proper management/drainage of moisture (e.g. EIFS or synthetic stucco without an engineered drainage system).
- Vinyl parts or weather strip that has non-factory-applied paint or stain voids the warranty of the affected unit.
- Warpage or air/water infiltration on any swing door with a call-out height of greater than 6'10" unless CRESTLINE'S multi-point lock system is used with the door.
- Any installations at an altitude over 3,500 feet above sea level unless capillary tubes have been installed or a HIGH ALTITUDE GLASS PACKAGE is used, which provides limited coverage.
- Products or components not provided by CRESTLINE including but not limited to hardware locksets, strikes, or panning systems.
- CRESTLINE products that are stacked or mulled with products manufactured by others.
- Products with modifications (e.g. customer applied point finishes, tints, films) or security systems without prior approval.

ADDITIONALLY

- Insulated units with capillary tubes will not have inert gas fill.
- ADA-compliant sills or telescoping, pocket and bifold patio door systems are not designed nor are they intended to manage moisture or water infiltration. The

determination of proper building design and moisture management (through an overhang or otherwise) is the responsibility of your building designer, architect or contractor.

- Warping of a door shall not be deemed to be a product defect unless the warping is in the door panel itself and then only if the warping is more than one quarter inch. The amount of warp shall be determined by placing a taut wire or string or straightedge across the face of the installed door panel thought to be concave and measuring the amount of warp at the point of the greatest distance between the bottom of such wire, string or straightedge and the face of the door panel. CRESTLINE may, at its option, defer action on a warping claim for a period of not more than ONE (1) year from the date of the claim to permit the door panel to adjust to temperature and humidity in its installed position.
- The performance of windows and doors may be affected by factors beyond CRESTLINE'S control. Examples include handling and installation, construction details of the building, exposure conditions, maintenance, normal wear and tear, and migration of inert gas. Structural or thermal ratings are for comparison purposes only. While CRESTLINE products are manufactured to meet or exceed published ratings, it is not possible to guarantee that they will meet or exceed those ratings after they have been installed.
- CRESTLINE is not responsible for removing any defective products from the structure in which they are installed, or for installing any replacement products or components provided by CRESTLINE pursuant to this limited warranty, or for any painting, refinishing or other work necessary to complete the installation of replacement products or components, all of which shall be the consumer's responsibility.
